Mid-Valley Orthopedics
located at 400 NW Hickory Ave.,
Suite 200 in Albany.**

Samaritan
Mid-Valley Orthopedics

Building healthier communities together

The Samaritan Fracture Clinic provides emergency department, urgent care clinic and primary care providers a consistent place to refer their patients for follow-up treatment of non-surgical extremity fractures and some soft tissue injuries such as sprains and dislocations.

This clinic is designed to allow primary care providers who do not have the time or the desire to treat orthopedic trauma a place within Samaritan to refer their patients for timely and consistent orthopedic care. The clinic, however, is not designed for initial injury evaluations, patients needing extensive surgery, or patients who have been seen by or had a telephone consultation with the on-call orthopedic surgeon.

The clinic has access to Samaritan's Picture Archiving Computer System (PACS) for viewing x-rays, and a selection of the latest splints and casting materials to better serve your patients.

For more information about the clinic, call (541) 812-5820.

How to make a referral

To make a referral, call ext. 3147. Please leave a voicemail if you are making a referral after office hours. X-rays for after hours referrals will be reviewed the next business day.
