## INTRODUCTION

InterCommunity Health Network (IHN) is pleased to provide the 2011 IHN Formulary as a reference and informational tool for physicians, pharmacists and patients. The IHN Formulary is designed to assist practitioners in selecting clinically appropriate and cost-effective products for their patients. Only the drugs listed on this closed formulary will be covered by IHN.

### The SHPO Pharmacy and Therapeutics (P & T) Committee

The SHPO PandT Committee has reviewed all the medications listed on the formulary. Medications found to be clinically appropriate and cost effective have been selected as an option for IHN members. If a physician deems an unlisted product to be medically necessary, the physician may request coverage through the medical exception process.

### Notice

This formulary is not intended to be a substitute for a medical provider's knowledge expertise, skill or judgement. IHN assumes no responsibility for the actions or omissions of any medical provider based upon the information herein. The medical provider should always consult the drug manufacturer's product insert for detailed information.

IHN covers both brand name drugs and generic drugs. A generic drug has been approved by the FDA and has the same active ingredient as the brand name. Generally, when a generic version of a drug is available IHN will require that the generic be used by members unless it is medically necessary for a member to use the brand version of a drug.

IHN uses a "formulary," that lists the covered prescription medications. Some covered medications may have additional requirements or limits on coverage. These requirements may include:

- **Prior Authorization (PA):** IHN requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from IHN before you fill your prescriptions.
- **Managed Drug Limits (MDL):** For certain drugs, IHN limits the amount of the drug that is covered.
- **Specialty Drug:** These drugs should be obtained through the CVS Caremark Specialty Pharmacy.

You can find out more about additional requirements or limits on covered medication by contacting our Customer Service Department or you physician

## Preface

The IHN Formulary is a listing of preferred drug products eligible for reimbursement by IHN. All medications are organized by therapeutic class and are listed with both the brand and generic name. For your convenience an index by both brand and generic names is located at the end of the IHN Formulary. Brand names are listed to assist in product recognition. Unless noted, all applicable dosage forms and strengths are generally covered. Extended release formulations (e.g., ext-rel, SR) are not considered formulary drugs unless specified. IHN will not cover prescription drugs when prescribed for experimental, investigational or non-FDA approved indications.

## Product Selection Criteria

The SHPO P&T Committee is composed of physicians, pharmacists and health professionals. The primary goal of the Committee is to maintain and evaluate the IHN formulary based upon an objective analysis of the safety, efficacy, indications, adverse events, compliance, contraindications and cost effectiveness of each drug. When a new drug is considered for formulary inclusion, it will be reviewed relative to similar drugs currently included in the IHN Formulary. Formulary decisions are communicated quarterly on the IHN internet site.

## Lost or Stolen Medications

The IHN policy for lost or stolen medications is that they are not covered unless the medication is emergent and a police report has been filed. Narcotic medications will never be filled early due to being lost or stolen. Please call the help desk at (541) 768-5207 or 1-888-435-2396 if you have any other questions regarding a member with this situation.

## Mental Health Drugs

The following drugs are financed separately by the State of Oregon (OMAP) and not subject to the IHN Formulary. This list contains the vast majority of products covered by the state, but may not be all-inclusive. Brand names listed are for reference only. Changes to the list may occur during the year.

## Generic Substitution

The brand names listed in the formulary are for reference only. Only FDA approved "AB" rated generic drugs are considered to be therapeutically equivalent.

## Medication Exception

Exceptions are made in two rare circumstances:

1. There is a documented reaction to a component of the generic not present in the branded product. Usually this is a dye, filler, or preservative.
2. There is objective evidence of therapeutic failure after adjustment of dosage and/or timing of doses, and assurance of patient compliance. An example would be failure obtain/maintain therapeutic drug levels after dosage adjustments.

The process for requesting nonformulary medication(s) requires faxing a completed medical exception form to your group's Medical Director. The Medical Director will review the form and make a decision.

## PRIOR AUTHORIZATION

Drugs indicated with "PA" require Prior Authorization for coverage. Please call IHN at (541) 768-5207 or 1-888-435-2396 or fax a completed PA form to 1-888-415-1066 for the following medications. This list is subject to change.

# FORMULARY

The first column of the chart lists the Brand and Generic drug name.

- Brand name drugs are CAPITALIZED (e.g., AMOXIL)
- Generic drugs are listed in lowercase (e.g., amoxicillin)

The second column identifies if a drug requires a PA, MDL or a Specialty drug.
